History

Innovation, perseverance, and close attention to customer needs have characterized Kennametal since its founding in 1938. Metallurgist Philip M. McKenna pioneered the use of a tungsten-titanium carbide alloy in cutting tools, and in the process, rewrote the standards for machining steel.

Kennametal has not rested since.

Today, we are a diverse, global enterprise with nearly 11,000 employees doing business in more than 60 countries, with approximately \$2 billion in annual revenues. Our reputation for innovation is kept alive by more than 700 highly trained and experienced technical personnel, a forward-focused group that averages 40 US patents each year.

With Kennametal, you'll discover a strategic partner that can be counted on to listen first — and then lead.

1848 Greenfield Tap & Die is founded

1938 McKenna Metals Co. organized

1958 Expands, forming Kennametal Overseas Corporation

1991 Kennametal spends \$27 million to build its Corporate Technology Center

1997 Kennametal acquires Greenfield Industries Inc.

2004 Kennametal purchases Conforma Clad

2007 China investment — Tianjin opens
Kennametal acquires ISA

2009 Kennametal acquires Romicon™

2010 Kennametal implements transformation aligned to segments

2008 Kennametal acquires Tricon

2006 Kennametal acquires Sintec and Camco

2002 Kennametal acquires WIDIA (India) Ltd.

1993 Kennametal acquires German toolmaker, Hertel AG

1967 Kennametal completes its initial public offering of stock

1943 McKenna Metals is incorporated as Kennametal Inc.

1925 WIDIA™ is founded

Who We Serve

As a global solutions provider, Kennametal is everywhere our customers need us to be.

We support enterprises operating in everything from airframes to coal mining, from engines to natural gas wells, from turbochargers to construction. Just as every customer is different, so are their needs, but they recognize the extraordinary contributions Kennametal has made — and continues to make — to their value chains.

From Buenos Aires to Beijing, Moscow to Fuerth, and Houston to Tokyo, Kennametal is at the epicenter of today's most compelling operations in hundreds of geographies and rapidly expanding industries. Our global presence facilitates rapid responses to our client's most challenging needs. The application experts who make up our field sales force become immersed in customers' operations — the mine, the shop floor, the construction site — so they can quickly solve problems and increase productivity. After all, the world is our proving ground for the technologies and next-generation solutions we engineer every day.

Customers turn to Kennametal to increase productivity and profitability, regardless of the challenge they face. They demand a partner with Different Thinking.

Kennametal

Tooling Systems

2013 Catalog

Kennametal is proud to present the latest Kennametal Tooling Systems catalog, featuring the new KM4X™, proven to offer the best performance from the machine tool and handle the toughest materials. Other products range from ISO standard KM™ Quick Change tooling to ERICKSON™ toolholder systems: HSK, DV, BT, CAT, Shrink Fit, hydraulic chucks, collet systems as well as commodity-type holders to fully support your individual application needs.

Look for the catalog **Summer/Fall 2012**. Contact your local Authorized Distributor or visit www.kennametal.com for more information.

Our All-New Grade and Geometry Converter
Mobile Application Is Available as a **Free Download**
from the iTunes™ App Store and Android™ Marketplace.

Now Available

Our app is an excellent tool that enables you to input competitor grade and geometry information to find the equivalent Kennametal grades and geometries for a wide range of competitive grades and geometries in your application.

Easy to Download

Go to your device's application store and search for "Kennametal", and then follow your application store's directions on downloading. It's simple, fast, and free.

Easy to Use

Once the application is downloaded on your mobile device, launch the application, and select the "convert" tab at the bottom of the screen. Next, choose if you want to convert by competitor grade or geometry.

Once you decide, select a manufacturer from the list, and select the grade or geometry. The application will then display all of Kennametal's comparable grades or geometries in different material types.

If you already know your grade or geometry, you can use the search tab at the bottom of the screen to search by competitor grade or geometry and display the Kennametal equivalent.

Metalcutting Safety

IMPORTANT SAFETY INSTRUCTIONS

Read before using the tools in this catalog!

Projectile and Fragmentation Hazards:

Modern metalcutting operations involve high spindle and cutter speeds and high temperatures and cutting forces. Hot metal chips may fly off the workpiece during metalcutting. Although cutting tools are designed and manufactured to withstand high cutting forces and temperatures, they can sometimes fragment, particularly if they are subjected to over-stress, severe impact, or other abuse.

To avoid injury:

- Always wear appropriate personal protective equipment, including safety goggles, when operating metalcutting machines or working nearby.
- Always make sure all machine guards are in place.

Breathing and Skin Contact Hazards:

Grinding carbide or other advanced cutting tool materials produces dust or mist containing metallic particles. Breathing this dust or mist — especially over an extended period — can cause temporary or permanent lung disease or make existing medical conditions worse. Contact with this dust or mist can irritate eyes, skin, and mucous membranes and may make existing skin conditions worse.

To avoid injury:

- Always wear breathing protection and safety goggles when grinding.
- Provide ventilation control and collect and properly dispose of dust, mist, or sludge from grinding.
- Avoid skin contact with dust or mist.

For more information, read the applicable Material Safety Data Sheet provided by Kennametal and consult General Industry Safety and Health Regulations, Part 1910, Title 29 of the Code of Federal Regulations.

These safety instructions are general guidelines. Many variables affect machining operations. It is impossible to cover every specific situation. The technical information included in this catalog and recommendations on machining practices may not apply to your particular operation. For more information, consult Kennametal's Metalcutting Safety booklet, available free from Kennametal at 724.539.5747 or fax 724.539.5439. For specific product safety and environmental questions, contact our Corporate Environmental Health and Safety Office at 724.539.5066 or fax 724.539.5372.
